

# PROTON DATA DEFENDER

SaaS software. Consistently maintain an audit-worthy, media destruction report with no limit on users or memory storage.

## FACILITY

- **Records can be printed** directly from inside the application.
- **More reliable** than a hardware-based solution.
- **99.999%** availability uptime.
- **Records can be exported** as a CSV file compatible with any accounting software, providing a complete audit trail.

## FEATURES & BENEFITS

- Instant access **from anywhere on Earth**
- Unlimited operators **per license**
- Complete **Secure Audit Trails**
- All records are **keyword searchable**.
- Filtered search **results can be downloaded** as CSV files.
- Proton Data Defender allows the account owner to **pull only the records for one specific operator** on your account and download them.
- Simply log in, scan your hard drive serial number and **IMMEDIATELY** populate the report with the necessary information.
- Runs on any computer, laptop or tablet with a USB port without requiring expensive third party hardware
- Reference destruction history for every data storage device processed, regardless of the Proton model.
- **NO** memory storage limitations so **UNLIMITED** records can be maintained.
- Rapid search function allows for immediate location of data in any field.
- Tamper-resistant self-locking records.

## OPERATION

- **Totally secured under SSL** encryption. Using Proton Data Defender is **as secure as logging into your bank** on-line.
- **Records can be accessed from anywhere on Earth** at any time.
- Software **updates are automatic**, instantly available under your account and require **no downloads or installation**
- **Once license allows any number of operators** from your organization to create or access records from anywhere on Earth.
- Works with your existing internet-connected laptops, or **any internet-connected device with a USB port and a web-browser**. Just plug in your laser barcode scanner and go.
- **Far less expensive** to achieve legal and/or regulatory compliance than using any hardware-based solution.

**PROTON DATA SECURITY**
