

DATADEFENDER[®] SECURITY CART

Lockable security cart designed for mobility, minimal operator handling and efficient degaussing.

SPECIFICATIONS

- Accepts all magnetic media within 1 x 4.3 x 6 inches including HDD (Desktop, laptop and server drives) and tape media (LTO, DLT, 3590 series, DDS, etc)
- Weight: 40 lbs (18.14 Kg)
- Dims: 39 x 17 x 38 inches (99 x 43 x 96.5 cm)
- Heavy duty swivel casters with “no noise” wheels
- Casters include brake lock top plates and ball bearings (designed for use in data centers) (you can move this line to the line above if it fits better)
- Ergonomic handle
- Key Lock door - includes two keys and two collection bins. Lock is customizable
- Tamper-resistant screws with locking hardware on inside prevents access without key
- Made in USA

FEATURES & BENEFITS

- Fully automatic operation - no drawer to open and close. Simply insert media at top and push start button
- Configurable with Proton’s NSA Degaussers (T-4 and T-5).
Meets NSA requirements for sanitizing Top Secret / Classified data
- Gravity-assisted drop ensures degaussed media is delivered into locked collection bin below
- Hard Drives are inaccessible during entire process to prevent tampering
- LCD communicates degaussing status and displays digital cycle counter
- Constructed of antistatic, lightweight material. Ideal for use in data centers, military bases, hospitals and offices
- Maintain chain of custody and prevent data loss by moving cart to area media is waiting to be degaussed
